

**Firm Overview**
**Parvin Asset Management**

offers traditional and alternative investment management to address the specific needs and preferences of the individuals and families we serve. Our objective is to preserve capital and to provide higher risk-adjusted returns than the market. To accomplish this goal for equities, we concentrate on the fundamental importance of value and profitability. Equity portfolios are constructed with focused positions since we view too much diversification as lowering the opportunity for higher returns without reducing risk. As a result, we build portfolios with stocks that are typically spread among 20 equal-weighted positions. In general, we look for stock holdings that are usually characterized by high returns on capital; steady earnings growth; reasonable valuation; substantial income, as appropriate; and diversification across six, or more, economic sectors.

**Solari Investment Advisory Services**

is a registered investment advisor offering Solari Screens and research services. For selected investment strategies, Solari provides Parvin with Solari Screens and research services which include: (1) a review of individual company leadership and management business practices; (2) an analysis of geopolitical and regulatory risks impacting individual companies and their industries; and (3) an analysis of any related commodity and/or capital prices. Solari does not offer direct portfolio management.

**Investment Strategy**

**Parvin Select Equity Solari Space** is a portfolio designed to participate in the growth of the private space industry and the space-based economy. Investments are limited to companies that have meaningful revenues derived from markets related to products and services designed for use beyond the earth's atmosphere. These markets include: materials and structures for spacecraft fabrication; rocket propulsion; launch and control facilities; guidance systems; satellites and related suborbital operations; space exploration and development; and asteroid mining and related hardware, software and communications services. The objective is to identify businesses adding value through genuinely productive space-related activities, whether immediately or eventually profitable, which have the potential to provide high returns to shareholders. Stock holdings are not limited to any market capitalization level or geographic area and typically reflect an all-cap, global presence targeting both growth companies and seasoned businesses generating cash from well-established operations. The portfolio may earn revenues from the defense markets, since companies involved in the space industry are generally military contractors; and the portfolio may include companies whose primary business is not related to the space-based economy. By design, this strategy is not diversified and is heavily concentrated in one sector. As a result, portfolio returns may be significantly more volatile than a broadly diversified portfolio of equity investments.

**Portfolio Highlights**

Growth of earnings and dividends is the primary objective of this strategy

Global portfolio focused on the private space industry with up to 20 equally-sized stock positions

Selection process emphasizes companies with growth derived from the space-based economy

Foreign dividends are subject to withholding taxes but often represent qualified income for U.S. tax purposes
