

Firm Overview

Parvin Asset Management

offers traditional and alternative investment management to address the specific needs and preferences of the individuals, families and institutions we serve. Our objective is to preserve capital and to provide higher risk-adjusted returns than the market. To accomplish this goal for equities, we concentrate on the fundamental importance of value and profitability. Equity portfolios are constructed with focused positions since we view too much diversification as lowering the opportunity for higher returns without reducing risk. As a result, we build portfolios with stocks that are typically spread among 20 equal-weighted positions. In general, we look for stock holdings that are usually characterized by high returns on capital; steady earnings growth; reasonable valuation; substantial income, as appropriate; and diversification across six, or more, economic sectors.

Investment Strategy

Parvin Hedged Equity Emerging Markets is a strategy designed for investors attempting to limit risk while realizing the diversification benefits and growth potential of international stocks in emerging markets. Equity investments in these portfolios remain hedged in an attempt to prevent significant losses during volatile periods. We work to generate additional gains and to avoid potential losses by continually hedging each portfolio. Additional gains may be realized from premiums received selling cash-backed put options and covered call options on individual stocks. Potential losses can be limited by counteracting market sell-offs with iShares MSCI Emerging Markets ETF (EEM) put options. The result should be more stable returns than those of a long-only emerging markets equity portfolio. Investors should anticipate that our hedging strategy reduces some, but not all, volatility. Margin, or leverage in the form of borrowed funds, is never used.

Portfolio Highlights

Downside protection, current income, and upside participation are primary objectives of this strategy

Selections driven by economically profitable businesses, based in emerging markets, trading at prices below intrinsic value

Focused portfolio diversified internationally with up to 20 equally-sized stock positions and protective put options

Offsetting returns of stocks and protective put options are inherently tax-efficient; foreign dividends will be subject to withholding taxes but often represent qualified income in the U.S.

Portfolio Manager
J. Steven Smith, CFA®

- Managing Director, Parvin Asset Management
- Investment Committee Member and Portfolio Manager, Nuveen (Radnor, PA)
- Treasurer, Harman International
- Vice President, Lehman Brothers
- Analyst, Morgan Stanley
