

**Firm Overview**

**Parvin Asset Management**

offers traditional and alternative investment management to address the specific needs and preferences of the individuals, families and institutions we serve. Our objective is to preserve capital and to provide higher risk-adjusted returns than the market. To accomplish this goal for equities, we concentrate on the fundamental importance of value and profitability. Equity portfolios are constructed with focused positions since we view too much diversification as lowering the opportunity for higher returns without reducing risk. As a result, we build portfolios with stocks that are typically spread among 20 equal-weighted positions. In general, we look for stock holdings that are usually characterized by high returns on capital; steady earnings growth; reasonable valuation; substantial income, as appropriate; and diversification across six, or more, economic sectors.

**Investment Strategy**

**Parvin Hedged Equity International** is a strategy designed for risk-averse investors to realize the diversification benefits and growth potential of international stocks in developed markets but guard against the full impact of market losses. Equity investments in these portfolios remain hedged in an attempt to prevent significant losses during volatile periods. We work to generate additional gains and to avoid potential losses by continually hedging each portfolio. Additional gains may be realized from premiums received selling cash-backed put options and covered call options on individual stocks. Potential losses can be limited by counteracting market sell-offs with iShares MSCI EAFE (EFA) put options. The result should be relatively stable returns that reflect a combination of the lower volatility of bonds and the higher appreciation of stocks. Margin, or leverage in the form of borrowed funds, is never used.

**Portfolio Highlights**

Downside protection, current income, and upside participation are primary objectives of this strategy

Focused portfolio diversified internationally with up to 20 equally-sized stock positions and protective put options

Selection process driven by economically profitable businesses, domiciled outside the U.S., trading at prices below intrinsic value

Offsetting returns of stocks and protective put options are inherently tax-efficient; foreign dividends will be subject to withholding taxes but often represent qualified income in the U.S.

**Managing risk is a critical aspect of any investment process. The preservation of capital is an important goal at Parvin, but there is no guarantee against loss since risk is inherent in every capital allocation decision. All portfolios are held by independent custodians.**
