

Firm Overview

Parvin Asset Management

offers traditional and alternative investment management to address the specific needs and preferences of the individuals, families and institutions we serve. Our objective is to preserve capital and to provide higher risk-adjusted returns than the market. To accomplish this goal for equities, we concentrate on the fundamental importance of value and profitability. Equity portfolios are constructed with focused positions since we view too much diversification as lowering the opportunity for higher returns without reducing risk. As a result, we build portfolios with stocks that are typically spread among 20 equal-weighted positions. In general, we look for stock holdings that are usually characterized by high returns on capital; steady earnings growth; reasonable valuation; substantial income, as appropriate; and diversification across six, or more, economic sectors.

Investment Strategy

Parvin Select Equity High Income represents an extension of Parvin's core stock selection approach highlighting value and profitability. While following the same fundamental equity strategy, there is an additional requirement for substantial income. These portfolios are designed to provide a relatively high level of income from dividends that are anticipated to be sustained over time. Returns on Select Equity High Income portfolios are usually derived from income more than growth, with yields that are typically higher than market levels.

Portfolio Highlights

High income and modest growth are primary objectives of this strategy

Focused portfolio diversified with up to 20 equally-sized stock positions

Selection process concentrates on finding economically profitable businesses trading at prices below intrinsic value

Most dividend payments represent qualified income for tax purposes

Portfolio Manager
