

Firm Overview

Parvin Asset Management

offers traditional and alternative investment management to address the specific needs and preferences of the individuals, families and institutions we serve. Our objective is to preserve capital and to provide higher risk-adjusted returns than the market. To accomplish this goal for equities, we concentrate on the fundamental importance of value and profitability. Equity portfolios are constructed with focused positions since we view too much diversification as lowering the opportunity for higher returns without reducing risk. As a result, we build portfolios with stocks that are typically spread among 20 equal-weighted positions. In general, we look for stock holdings that are usually characterized by high returns on capital; steady earnings growth; reasonable valuation; substantial income, as appropriate; and diversification across six, or more, economic sectors.

Investment Strategy

Parvin Select Equity International follows Parvin's core approach emphasizing value and profitability to construct portfolios of large companies domiciled outside the United States. This strategy is designed for investors to realize the diversification benefits and growth potential of international stocks in developed markets. Returns on Select Equity International portfolios are usually derived from growth more than income, with yields that typically approximate market levels.

Portfolio Highlights

Steady growth of earnings and dividends is the primary objective of this strategy

Focused portfolio diversified internationally with up to 20 equally-sized stock positions

Selection process looks for consistently profitable businesses domiciled outside the U.S. which trade attractive values

Dividends are subject to withholding taxes but often represent qualified income for U.S. tax purposes
