Firm Overview

Parvin Asset Management

offers traditional and alternative investment management to address the specific needs and preferences of the individuals, families and institutions we serve. Our objective is to preserve capital and to provide higher risk-adjusted returns than the market. To accomplish this goal for equities, we concentrate on the fundamental importance of profitability and value. Equity portfolios are constructed with focused positions since we view too much diversification as lowering the opportunity for higher returns without reducing risk. As a result, we build portfolios with stocks that are typically spread among 20 equal-weighted positions. In general, we look for stock holdings that are usually characterized by high returns on capital; steady earnings growth; reasonable valuation; substantial income, as appropriate; and diversification across six, or more, economic sectors.

Strategy Overview

Parvin Select Equity represents Parvin's core equity investment approach highlighting the fundamental importance of profitability and value. The selection process remains focused on finding economically profitable, well managed businesses with meaningful competitive advantages and on purchasing these companies at prices below their intrinsic values. Returns on Select Equity portfolios are usually derived from growth more than income, with yields that typically approximate market levels. The most significant risk for this strategy is underperforming stock selections. Margin, or leverage in the form of borrowed funds, is never used.

Portfolio Highlights

Steady growth of earnings and dividends is the primary objective of this strategy

Focused portfolio diversified with up to 20 equally-sized stock positions

Selection process concentrates on attempting to find consistently profitable businesses trading at attractive values

Dividend payments usually represent qualified income for tax purposes

Managing risk is a critical aspect of any investment process. The preservation of capital is an important goal at Parvin, but there is no guarantee against loss since risk is inherent in every capital allocation decision.

All portfolios are held by independent custodians.
